

Olembic.

Distill the signal. Silence the noise.

An open-source AI brand-intelligence agent that reads the internet, learns which sources matter, and files you a weekly briefing.

VAIBHAV SINGH
Northeastern MSCS
vaibhavsingh97.com

You know they're talking about you.

You don't know what they're saying.

The brand-monitoring market is worth \$8B a year. And it's failing the people who need it most.

ENTERPRISE PRICE

Sprout Social and Brandwatch start at \$15,000 a year.
Small brands are priced out.

5,000 MENTIONS. ZERO ANSWERS

Existing tools dump raw mentions into dashboards.
Founders spend hours per week trying to find what
actually matters.

STATIC. UNLEARNING

No tool learns which sources matter for YOUR brand.
Twitter noise gets the same weight as a Wall Street
Journal review.

One weekly briefing.

Written by AI.

01

LISTEN

Olembic scans social media, news outlets, review sites, and forums for mentions of your brand. Every day. Every hour.

02

DISTILL

AI classifies each mention by entity, sentiment, and importance. A learned bandit ranks which sources matter most for YOUR brand.

03

DELIVER

Every Monday, you get a written briefing. What people said. What matters. What you should do about it. In plain English.

Not a dashboard. A narrative.

AI that *learns* which sources actually matter for your brand.

Why now: Large language models became cheap enough in 2024 to read every mention. Bandit algorithms mean the system gets smarter on your brand, week by week.

Simple pricing. *Real ROI.*

FREE

Open Source

\$0

/forever

Self-hosted. Full pipeline. Community support.

CREATOR

Solo Brand

\$49

/month

1 brand · Monthly briefing · Hosted · Email support

GROWTH

Small Business

\$199

/month

3 brands · Weekly briefing · Slack digest · Priority support

AGENCY

White-label

/month

10 brands · White-label · API access · Dedicated CSM

PROJECTED · 100 paid users by Q4 2026 · \$100K ARR by month 12 · Gross margin 82%

How we reach the *first 100 users*.

01

OPEN-SOURCE LAUNCH

GitHub repo public. Documentation shipped. Product Hunt launch day 1. Target: 500 GitHub stars in month 1.

02

CONTENT FLYWHEEL

Weekly case studies from real Olembic runs, published on dev.to, Hacker News, and Console DevTools newsletter (750K devs).

03

DESIGN PARTNERS

Three marketing agencies serving SMBs. Free 6-month pilot in exchange for referenceable case studies and feature input.

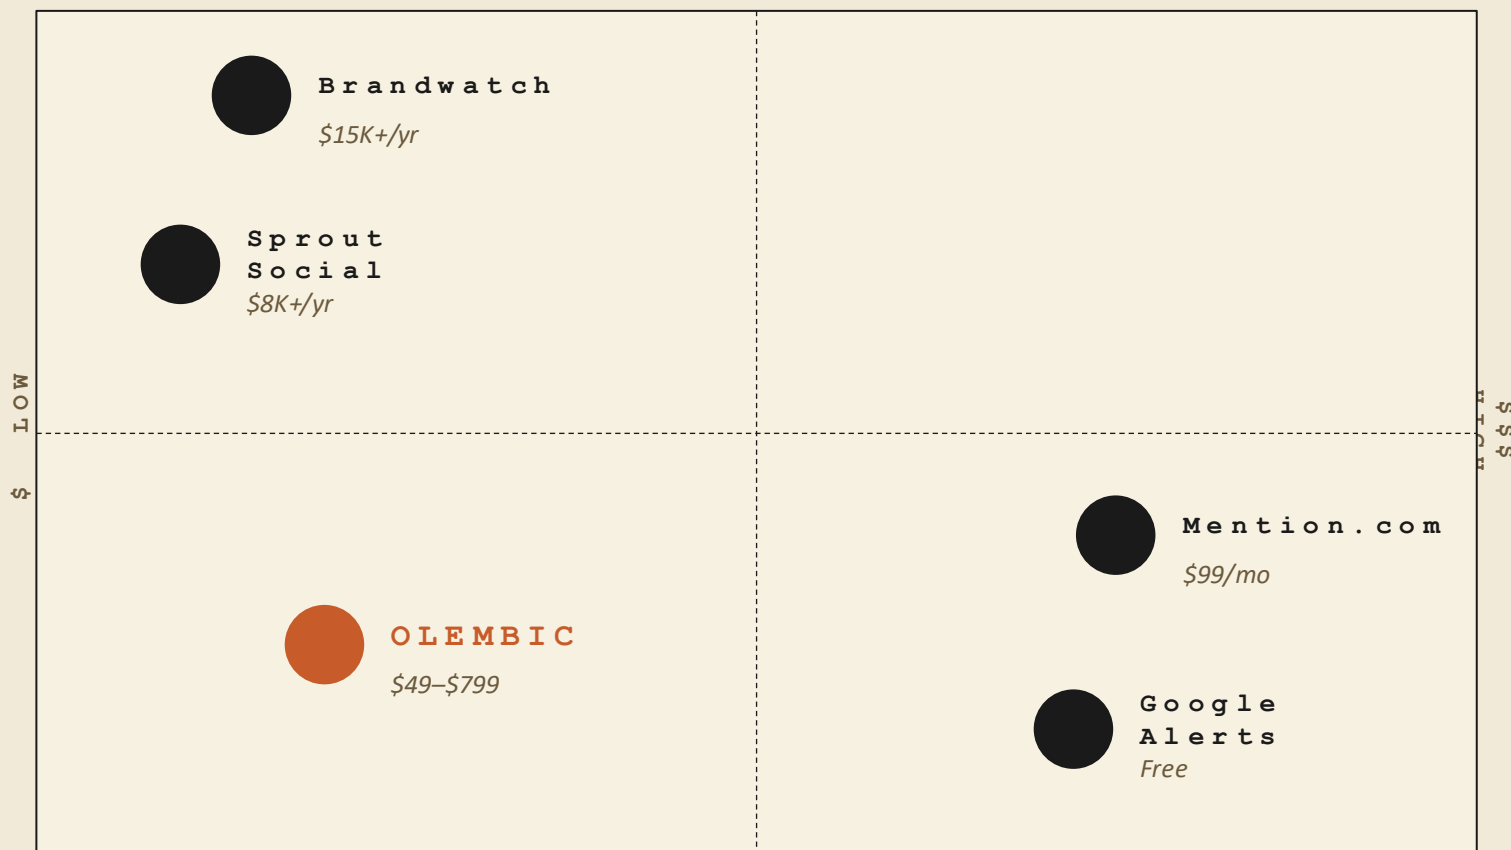

04

CREATOR SEEDING

Ten indie founders with public brands get free Growth tier for 6 months. Their reports become social proof.

Where we live in the *market*.

HIGH INTELLIGENCE → NARRATIVE

LOW INTELLIGENCE → DASHBOARD

OUR UNFAIR ADVANTAGE

- 01** AI-native from day one. Not retrofitted onto a legacy dashboard.
- 02** Learns YOUR sources. Bandit-based source ranking, not a fixed feed.
- 03** Open-source flywheel. Every self-hosted install is a warm lead.
- 04** Delivered as narrative. The only tool that writes, not displays.

From MVP to *\$100K ARR.*

Q 1 2 0 2 7

MVP COMPLETE

n8n pipeline running · GPT-4o-mini classification · HuggingFace Spaces demo live · Eval harness with golden data

PUBLIC BETA

GitHub launch · Product Hunt · 100 users · 500 GitHub stars · First case studies published

PAID TIER LAUNCH

Creator + Growth + Agency plans live · First \$1K MRR · First 3 agency design partners onboarded

AGENCY EXPANSION

White-label ready · 10 agency customers · Path to \$100K ARR · Seed raise closed

Working *today*.

OLEMBIC BRIEFING · WEEK OF JULY 07 2026

Brand: Acme Corp

SIGNAL SUMMARY

312 mentions this week. 87% positive sentiment. Signal-weighted mentions: 24 (up 40% WoW).

Top signal: A launch post from @dhh drove 18k views on Hacker News. Response was strongly positive around your CLI ergonomics.

Secondary signal: Two negative Trustpilot reviews mentioned onboarding friction. Both from users under 24 hours old. Worth a triage.

RECOMMENDED ACTION: Reply to the HN thread in the next 12 hours to maximize engagement. Review onboarding day-one experience.

WHAT'S RUNNING TODAY

n8n	Multi-source ingestion pipeline
GPT-4o-mini	Entity + sentiment classification
Bandit selector	Bellman-style source ranking
Eval harness	Golden datasets · phase gates
HuggingFace	Public Gradio demo deployed
Jinja2 template	Weekly briefing generator

LIVE DEMO
