02 PROBLEM / OPPORTUNITY

! THE PROBLEM

Too Many Sources

Marketers face an overwhelming number of platforms and publishers to monitor.

Manual Research

Manually finding, reading, and summarizing articles is time-consuming and inefficient.

Inconsistent Prioritization

Without a clear system, important insights can be missed or deprioritized in the noise.

THE OPPORTUNITY

In one workflow run, **135** marketing articles were collected from **5** distinct sources—far more information than a consultant can efficiently review manually.

HubSpot

Sprout Social

Hootsuite

Social Media
Examiner

Search Engine
Journal

One Simple Workflow From Topic to Client-Ready Insight

Marketing Intelligence Brief helps technology consultants turn marketing topics into structured insights they can use in client discussions.

From scattered marketing information to a clear consulting brief.

THE MAGIC, SIMPLIFIED

From Raw Articles to Actionable Intelligence

1 Collect

- HubSpot
- Sprout Social
- Hootsuite
- Social Media Examiner
- Search Engine Journal

2 Clean

Standardize title, date, author, link, and source.

3 Analyze

Gemini generates category, priority, summary, and marketing recommendation.

4 Deliver

Streamlit brief and human-readable CSV output.

AI organizes the information. The consultant makes the final decision.

SLIDE 5 BUSINESS MODEL

PROPOSED — NOT CURRENT REVENUE

1. INDIVIDUAL

PROPOSED

\$19 /month

For independent technology consultants.

2. TEAM

PROPOSED

\$49 /month

For small consulting teams.

3. CUSTOM

PROPOSED

CUSTOM PRICING

For consulting firms.

REVENUE LOGIC

Free Trial → Individual Subscription → Team Expansion → Custom Firm Plan

ILLUSTRATIVE REVENUE SCENARIO — NOT CURRENT REVENUE

10 Team users × \$49/month =
\$490 potential monthly recurring revenue.

Start Focused: Reach the First 10 Consulting Users

Target Users: Technology consultants at small and mid-sized businesses

1 Identify

Find and qualify technology consultants at small and mid-sized businesses.

2 Demonstrate

Show how our insights solve their real consulting challenges.

3 Offer a Pilot

Provide a low-barrier pilot to deliver immediate value.

4 Learn

Gather feedback and use insights to improve and adapt.

5 Convert

Convert successful pilots into long-term consulting clients.

Target: 10 pilot users for the next testing phase

Competitors Find Information. We Prepare It for Client Conversations.

Focus:

Information aggregation and monitoring

Gap:

Consultants still need to interpret the findings.

Focus:

Content research and trend discovery

Gap:

Requires more work to create client recommendations.

Focus:

Emerging trend identification

Gap:

Focuses on discovery rather than consulting-ready output.

Marketing Intelligence Brief

Focus:

Structured marketing insights for technology consultants

Advantage:

Simple workflow and ready-to-use consulting recommendations.

Conceptual Competitive Position

Purpose-built for consultant client deliverables

The Rise of AI-Powered Personalization in Retail

Source

Harvard Business Review

Priority Level

High

OUTPUTS

Trend Summary

AI-powered personalization is rapidly transforming retail by delivering hyper-relevant experiences, driving higher conversion rates and customer loyalty.

Why It Matters

Consumers now expect personalized experiences. Brands that leverage AI effectively will gain a competitive edge and increase market share.

Consultant Recommendation

Leverage AI to personalize customer journeys across channels. Start with high-impact use cases like product recommendations and dynamic content.

Priority Assessment

HIGH PRIORITY

High impact on growth and customer loyalty. Time-sensitive opportunity.

Source Context

Harvard Business Review article published on June 20, 2026, analyzing trends, case studies, and expert insights on AI personalization in retail.

This working prototype validates the core functionality, user experience, and value delivery of the proposed solution.

Help Us Turn a Working Prototype Into a Stronger Consulting Product

1 Pilot Participants

Technology consultants willing to test the prototype with real research topics.

2 Product Guidance

Feedback on recommendation quality, workflow clarity, and consulting usefulness.

3 Technical and Early-Stage Support

Support for live data integration, deployment, and broader testing.

Immediate Next Steps

1 Improve live article integration

2 Strengthen recommendation specificity

3 Test with more consultants

4 Define the paid pilot experience

From Marketing Information to Client-Ready Insight.
